### **Response to Restriction Requirement**

Applicant's election with traverse of Group II (claims 1-23) in the reply filed on June 16, 2006 is acknowledged. The traversal is on the ground(s) that a serious burden does not exist, especially since the inventions are commonly classified. This is not found persuasive because classification alone is not controlling. Moreover, the new examiner notes that pharmaceutical compositions (Group I) are limited to Class 424, whereas methods of administering food products (a part of Group II) are also classified in Class 426. Accordingly, the new examiner does not agree that a common search would necessarily apply to both groups.

The requirement is still deemed proper and is therefore made FINAL.

Claims 24-26 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

### **Additional Election of Species Requirement**

The current examiner additionally imposes the following election of species requirement on elected Group II.

Claim 1 is generic to patentably distinct species of "stress-induced diseases". The species are independent or distinct because, as is clear from the Markush group of dependent claim 15, the term "stress-induced diseases" encompasses a broad variety of etiologically unrelated conditions. (Certainly one skilled in the art would not reasonably expect that therapeutic success

Art Unit: 1614

with a psychiatric disorder (an "anxiety disorder", e.g., panic attacks), for instance, would be reasonably predictive of therapeutic success for treatment of irritable colon syndrome, an immunological disorder of poorly characterized origin).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
